

Vital Oxide Disinfectant Spray

INFO SHEET

WHAT IS IT?

Vital Oxide spray is a disinfectant approved by Health Canada and proven to kill 99.99% of bacteria and viruses in minutes and will eliminate odors at the same time.

Vital Oxide is a one-step disinfectant cleaner that is ready to use with no mixing required. You do not have to rinse after it has been applied.

It is also hypo-allergenic, non-corrosive, non-toxic, 100% biodegradable, no Volatile Organic Compounds (VOC) and fragrance free.

For a short period it will leave a film on anything you spray.

- **DO** clean debris or dust away first.
- Do **NOT** add water to this solution.
- Do **NOT** spray towards a person.
- Be sure that the container has a **WORKPLACE LABEL** on it to identify the product in the container and prevent accidental ingestion.

WHO SHOULD USE IT?

Cleaning spray and bottles are being distributed by supervisors in each service area. Further instructions will follow from supervisors.

WHEN DO I USE IT?

- **During COVID-19 period spray:**
 - Common areas daily (after meetings, after meals in kitchen, on door handles/knobs)
 - If an individual is exhibiting signs of influenza/cold, spray that area daily.
- Use the spray in conjunction with good personal hygiene measures: hand-washing, proper coughing/sneezing procedure and avoiding face touching.
- Use it with all normal and/or enhanced cleaning practices already happening in your workspace.

If you have any questions about cleaning procedures, supplies or equipment **please ask your supervisor.**

Instructions on next page.

Vital Oxide Disinfectant Spray

INFO SHEET

SPRAY BOTTLE INSTRUCTIONS:

Video instructions:

<https://vimeo.com/398663516/1a85d332a3>

1. Remove the nozzle from spray bottle.
2. Pour Vital Oxide into spray bottle. If needed, you can use a funnel to prevent spillage.
3. Re-insert the nozzle into the container.
4. Tighten the collar.
5. There are 2 types of spray settings on the spray bottle. Make sure the nozzle is set to mist.
6. Pull the trigger to spray the solution.
7. Aim at the surface you want to clean.
8. Spray on the surfaces that you want to disinfect such as desks, bed frames, tables, couches, etc until visibly wet.
9. Leave on the surface and let air dry, approximately 10 minutes.

HAND PUMP INSTRUCTIONS:

Video instructions:

<https://vimeo.com/398662916/1d6eb997a1>

1. Remove the nozzle from spray bottle.
2. Pour Vital Oxide into spray bottle.
3. Re-insert the nozzle into the spray bottle.
4. Tighten the collar.
5. Adjust the end of the sprayer to get a fine mist. To do this simply tighten the end of the nozzle (brass end) as much as possible.
6. Prime the sprayer using the hand pump.
7. Press the hand pump until you feel resistance.
8. Aim at the surface you want to clean.
9. Press the trigger (on the handle).
10. Spray the surface until visibly wet.
